Work Experience

SoFi – *Senior Software Engineer (Full Stack)*   Helena, MT **|** June 2018 to January 2024

Student Loans Team

- Team Lead for transition from monolithic application to more modern microservice architecture.
- Worked heavily with UI and creating contracts between the front end & back end for exactly how every single page would look and behave instead of one single form.

Personal Loans Team

- Implemented new features requests for Personal Loans from Product / Design.
- Integration of Ingo Api to automate payments to credit card companies for personal loan debt.
- Updating Emails to be sent with Braze based on kafka producers / consumers.
  - Monitoring and creating alerts for time sensitive/legally required emails.

Originations Core Team
- Modernized Operations tools with microservices, streamlining loan approval processes.
- Collaborated with Operations leads to identify and address applications shortcomings.

SoFi – *Software Engineer (Full Stack)*   Helena, MT **|** June 2015 to June 2018

Operations Team

- Ensured reliability of applications through full-stack development and support.
- Utilized Scala, Play Framework, and Java for a monolithic project focused on Operations tools.

Technologies

- **Full Stack Development:** Java, Kotlin, Javascript, Python, React, TypeScript, Spring Boot, Gradle, Postgres, Kafka, gRPC, Redis, jQuery, REST, SQL, and Dropwizard.
- **Tools & Others:** Experienced with Docker, Git, Atlassian Suite, Amplitude, Data Dog, Figma, Braze, Jetbrains Products, Kubernetes, Docker, GitLab CI/CD, and Bootstrap.

Education

Carroll College - Helena, Montana   Bachelor of Arts Software Engineering **|** 2015
